Introduction

Idea: To establish a B2C digital book rental service for hassle-free book access and combine it with offline book cafes to boost social interaction and enrich the reading experience for customers.

Challenges Faced by Book Lovers in Current Approaches:

- **Limited access** to diverse books in remote areas
- **Space constraints** from physical book storage
- Reading can be a solitary activity, leading to feelings of **isolation**
- **Limited exposure** to new authors and genres
- **Resistance to adopting digital platforms** among traditional book lovers

Our solution:

- Problem- Lack of time for physical bookstores
- Solution- Digital book rental + offline cafes
- Goal- Foster community and reading culture

By online renting and catalogues, users can see what all is available to rent, or buy in the book cafe near them. In this scattered market of renting, this initiative will focus on bringing a PAN Indian player.

**Company
owned cafés**

Books shuffling in fixed intervals based on demand

Café 1

Café 2

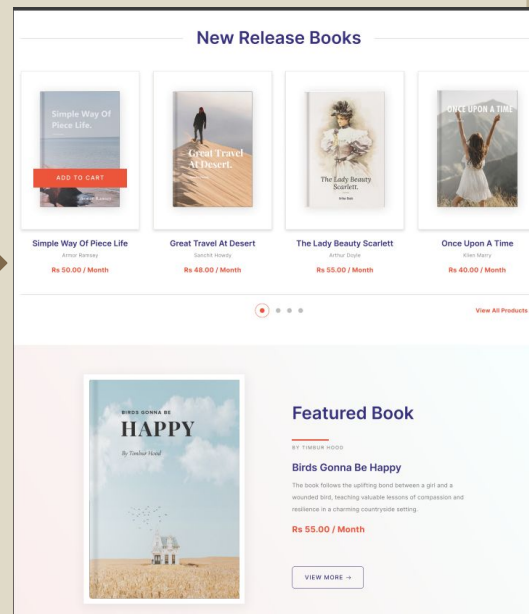

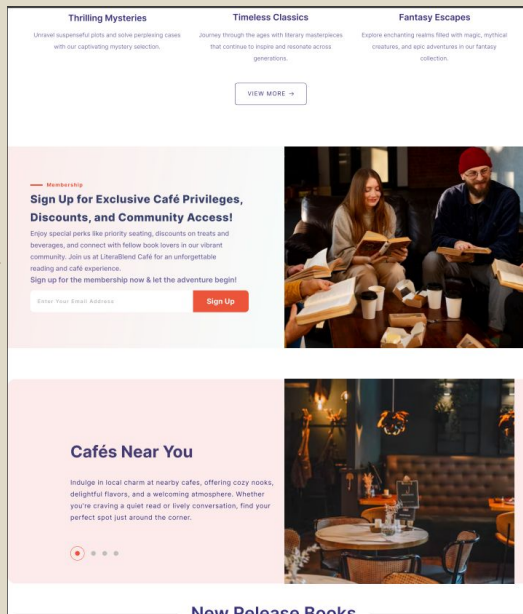

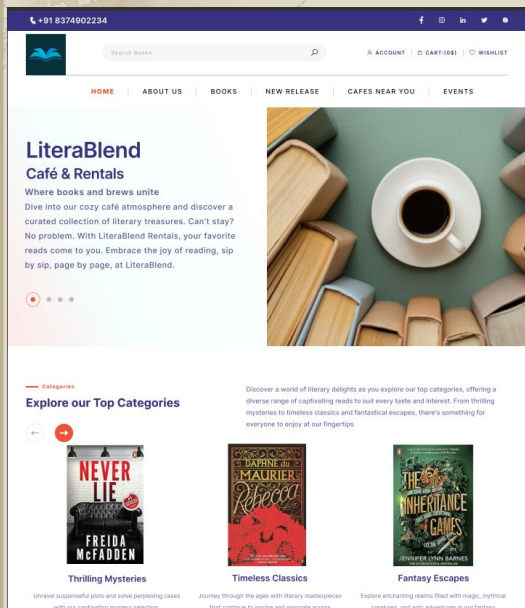

Café 3

Café rents out book to customer in that area

Conclusion

Peer groups and online research show high anticipation for a blend of user-friendly digital platforms with welcoming offline spaces as it offers the following benefits:

- **Convenience:** Easy book access without the need to visit a store
- **Community Building:** Promotes social interactions & relationships among readers
- **User-Centric Design:** Prioritise user experience, resulting in delight for customers
- **Technological integration:** Innovative technology improves operational efficiency
- **User Inclusivity:** Anywhere availability promotes user inclusivity

The suggested solution has two major challenges which are:

- **Initial Investment:** high set up expenses for online and offline infrastructure
- **Operational complexity:** Balancing digital and physical processes necessities
